DETAILED ACTION

Claim Objections

Claim 11 is objected to because of the following informalities:

As to claim 11, line 3, "the fur" lacks antecedent basis.. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 9-13, and 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi (Japan, 08-146763).

Takeuchi discloses an image forming apparatus having a photoconductive medium D; a developing roller 6 rotating in contact with the photoconductive medium D; a developing unit frame 1 supporting the developing roller 6 and storing toner T inside a receptacle; a toner supply roller 8 rotating in contact with the developing roller 6 with a nip with the developing roller 6 to supply toner T to the developing roller 6; and a cleaning unit 14 used to remove from the toner supply roller 8 the toner that remains after the toner is transferred from the toner supplying roller 8 to the developing roller 6. Note abstract. Since the cleaning unit 14 is stationary and the toner supplying roller 8 rotates, the movement cause by friction must somehow shake a portion of the toner supplying roller 8.

Allowable Subject Matter

Claims 2-6, 8, and 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Momiyama et al., Ikegawa et al., and Enoki et al. disclose art in developing devices.
